Overview

Software engineer with 4 years of experience building backend systems, data pipelines, and AI-powered products. Currently at Sentient Labs, working on voice agent evaluation platforms, LLM observability, and real-time data infrastructure. Previously at Adobe, shipping features across high-traffic web properties (12M+ daily visitors) and developer SDKs. IIT Madras CS graduate.

Experience

Senior Software Engineer

Sentient Labs

Remote

Feb 2025 – present

- Implemented a jury-of-judges evaluation framework with citation tracking for voice agent quality assessment on EL-dros.ai, Sentient Labs' simulation and evaluation platform for voice agents.
- Built custom simulation pipelines using Temporal that run voice agents through scripted scenarios and verify behavioral correctness against expected outcomes, supporting scheduled execution, retries, and concurrent evaluation runs.
- Set up a CDC pipeline using Debezium to stream change events from PostgreSQL into Apache Iceberg tables, enabling near-real-time analytical queries on production data for Metabase dashboards.
- Built a custom LLM observability stack to monitor and trace all LLM calls across services, providing latency, cost, and usage visibility across Sentient Chat.
- Created Metabase dashboards on Iceberg data for live product metrics including DAU, agent query volume, and usage trends, used by the product and leadership teams.
- Integrated ROMA — Sentient Labs' open-source recursive multi-agent reasoning framework — into Sentient Chat, enabling complex query decomposition, parallel sub-query resolution, and result aggregation for higher-quality responses.

Member of Technical Staff I → II

Adobe

Bangalore, India

July 2022 – Jan 2025

- Incorporated PDF ownership flow in ADM, which is estimated to increase MAU for reader by ~1.4M.
- Improved ADM's user interface by integrating React, resulting in a 2% decrease in cancellations.
- Integrated marketing tools like Adobe Analytics, Adobe Target into RDC pages.
- Created monitoring system (Splunk dashboards, alerts) for RDC backend services, which helped track usage and identify major areas of improvements.
- Enhanced PDFServices Node SDK with watermark functionality.

Education

Indian Institute of Technology Madras

BTech in Computer Science Engineering

2018 – 2022

- GPA: 8.32/10

Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL

AI & LLM: DSPy, GEPA, OpenAI API

Backend & Infrastructure: FastAPI, Spring Boot, Docker, Kubernetes, Temporal, AWS

Data & Observability: PostgreSQL, PySpark, Debezium, Apache Iceberg, Prometheus, Splunk, Metabase

Frontend: React, Redux, HTML, CSS

Achievements

CodeForces: Rated as Expert with max rating 1782.

JEE Advanced: All India rank 132 among 150,000+ candidates.

JEE Mains: All India rank 412 in JEE Mains among 1,200,000+ candidates.
